# 300 SERIES

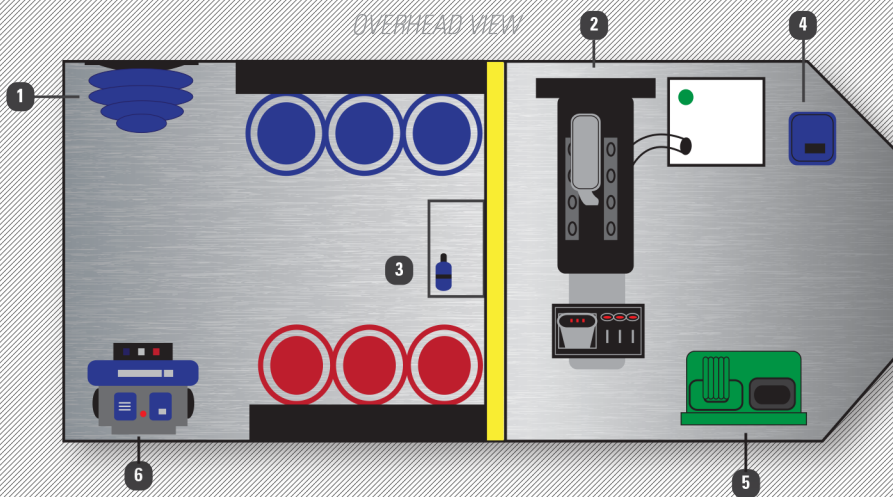

Designed for the Residential, Commercial, and SPF Roofing Insulator

The Spray Foam Systems ProPak 300 Series of Spray Foam Rigs are a great rig for the professional insulator looking to start off in the spray foam business. The SFS Rig is also a great addition to an existing Spray Foam Contractor. The E-30 Reactor 2 is a powerful machine capable of spraying up to 30 lbs. per minute of material. The Diesel Generator, powered by a John Deere engine, delivers a powerful load center with enough power and then some. The Rolair compressor provides a dependable air source with enough CFM to run the system and a mixer, allowing you to spray Open and Closed Cell Spray Foam Insulation. The Fusion AP spray foam gun by Graco is the choice of the industry and provides a reliable, easily maintainable and rebuildable SPF gun.

## BECOME ELITE:

The ProPAK XD3 Elite sets itself apart from all other spray rigs with the all new E-XP2 Reactor 2! With the Advanced Display Module and Graco Insite, as well as data control management upgrades, the ProPAK XD3 Elite Defines a new standard of mobile spray rig technology.

- ✔ Industry Leading Components Graco E-30 Reactor 2
- ✔ Turn Key Generator Powered Unit
- ✔ Open and Closed Cell Spray Foam
- ✔ Fresh Air and Safety Systems
- ✔ Climate Controlled Mobile Storage

**SYSTEM COMPONENTS**

- 1 Graco Powerlock Heated Hose
- 2 53-30 Diesel Generator
- 3 Fusion AP (Air Purge Gun)
- 4 Atlas Copco FX Refrigerated Air Dryers
- 5 Rolair Compressors
- 6 Reactor 2 E 30/E-XP2

## UPGRADE TO A DOUBLE SPRAYER SYSTEM

Setup in an 8x20 Horton Hauler, the Pro-PAK 300 can easily be towed by a ¾ ton truck. There is plenty of room to carry over three sets of foam and enough space to store ladders and scaffolding. The standard work bench stores all of your safety equipment.

Backed by the powerful Graco E-30 Reactor 2 this rig allows you up to 30 lbs per minute of material output and up to 310' of hose length. This rig is setup to spray open and closed cell spray foams and the power of the E-30 makes this a very efficient roofing rig.

Stand Alone Unit Powered by a 30,000 Watt John Deere Diesel Generator and 5HP Rolair Air Copressor.

Air System includes Graco T1 Transfer Pumps and Atlas Copco Air Dryer.
